Strong Eastlake, Gothic, and Queen Anne influences can all be seen on this large, imposing house. There is a porch that wraps around the northwest corner of the house, supported by Tuscan columns and a simple balustrade. The entry is a double door near the back of the porch. Almost all the windows have an elaborately carved entablature, with a floral design and sawtooth bottom. The windows also have functioning outdoor shutters. The house has four gabled dormers with brackets as well as entablature and shutters. There is a two-story octagonal bay window on the west side, and an oval window on the east side.
