right side and contains a brick foundation unlike the rest of the house that has a stone foundation. The front door is slightly off center and is off set by one, one-over-one double hung window on each side. Two double hung windows are located in the second story above the windows on the first floor. Wood shingles are the exterior wall material on the upper half, while vinyl siding is located on the lower portion, therefore it can be assumed the lower half was a change from wood shingles. Two chimneys are located on the house, one in the center and one in the rear. The center chimney appears to be newer based on a different material than the rear chimney. The north elevation contains many one-over-one double hung windows and a side door entrance. A one-story addition or smaller extension appears to be located in the rear of the house.
