This American Foursquare house is peppered with eclectic details. The façade is fairly symmetrical, except that the steps up to the porch are on the left side, and there are two front doors (perhaps the house was once a duplex?). The porch is supported by pairs of Doric columns, and covers the first floor of the façade. It has a dentilled cornice and turned-wood balusters. There are two octagonal bay windows on the second floor of the façade, and the north and south sides of the house each have a rectangular bay window on the first floor. A dentilled entablature circles the house between the first and second floors, and the second-floor siding flares out over it. Each side of the roof has a hipped dormer with unpainted shingle siding.
