**Report Associated With Project:**

**NADB #:**

- Door Selection: Single centered
- Door Position: Flush
- Orientation: Lateral axis
- Symmetry: Bilateral asymmetry
42. Further Description of Important Interior and Exterior Features (Con’t)

includes a pair of casement windows. The addition has a cinder block foundation and a small chimney jutting up within the roof's surface. At the second story, in the original body of the house, an original wood casement window has two horizontal mullions. A triangular vent is in the gable. The north elevation has two windows at the first story, which match the large window right of the entry at the east elevation. A pair of casement windows with two horizontal mullions is at the second story, within the gable, and a triangular vent is in the gable. A one-story addition is at the rear. The basement includes its original windows. The foundation of the house has been covered in a smooth concrete.
